## Government Executive Media Group

Thursday, November 13, 2014

**Gene L. Dodaro**

Comptroller General of the United States  
U.S. Government Accountability Office

## Agenda

---

Source: PhotoDisc.

- About GAO
- The case for data standards
- Persistent USAspending.gov data challenges
- Effective Implementation of the DATA Act
- Data analytics at GAO

---

## U.S. Government Accountability Office

---

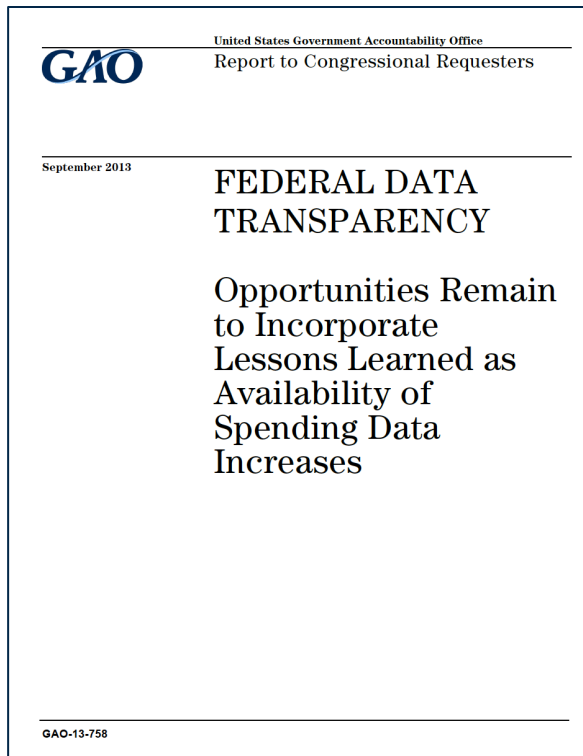

- Independent, nonpartisan congressional watchdog
- Advise Congress and executive agencies to help improve government performance and ensure accountability
- Work comes from Congressional mandates and requests and the Comptroller General's authority

# GAO goals and objectives to support the Congress and the Nation

Goals	Objectives	
<p><b>Provide Timely, Quality Service to the Congress and the Federal Government to...</b></p> <p>Address Current and Emerging Challenges to the Well-being and Financial Security of the American People related to...</p> <hr/> <p>Respond to Changing Security Threats and the Challenges of Global Interdependence involving...</p>	<ul style="list-style-type: none"><li>Health care needs</li><li>Lifelong learning</li><li>Challenges facing an aging population</li><li>Effective system of justice</li><li>Housing finance and viable communities</li></ul>	<ul style="list-style-type: none"><li>Stable financial system and consumer protection</li><li>Natural resources and the environment</li><li>National infrastructure</li><li>Benefits and protections for workers, families, and children</li></ul>
<p><b>Help Transform the Federal Government to Address National Challenges by assessing...</b></p>	<ul style="list-style-type: none"><li>Homeland security</li><li>Military capabilities and readiness</li><li>Government's fiscal position and approaches to address current and projected fiscal gaps</li><li>Federal government audit and internal control standards</li></ul>	<ul style="list-style-type: none"><li>Foreign policy and international economic interests</li><li>Major management challenges and program risks</li><li>Fraud, waste, and abuse, and improvements in internal controls</li></ul>
<p><b>Maximize the Value of GAO by Enabling Quality, Timely Service to the Congress and Being a Leading Practices Federal Agency by focusing on...</b></p>	<ul style="list-style-type: none"><li>Efficiency, effectiveness, and quality</li><li>Diverse workforce and inclusive work environment</li></ul>	<ul style="list-style-type: none"><li>Networks, collaborations and partnerships</li><li>Human, information, fiscal, technological, and physical resources</li></ul>

# The Case for Data Standards

Our earlier work on data transparency has found that the lack of consistent, reliable data:

- hampers the ability to link existing agency financial and award systems to monitor federal spending throughout the lifecycle
- limits data sharing across agencies, sectors of government and the law enforcement community to identify programs at risk for fraud, waste and abuse

# The Case For Data Standards (continued)

 United States Government Accountability Office  
Report to Congressional Addressees

---

April 2014

2014 Annual Report:  
Additional  
Opportunities to  
Reduce  
Fragmentation,  
Overlap, and  
Duplication and  
Achieve Other  
Financial Benefits

GAO-14-343SP

- limits comparability among like programs to accurately measure the cost and magnitude of federal investments and identify program duplication, overlap and fragmentation
- prevents easy aggregation of data at the government-wide level to optimize existing data sources and reduce reporting burden

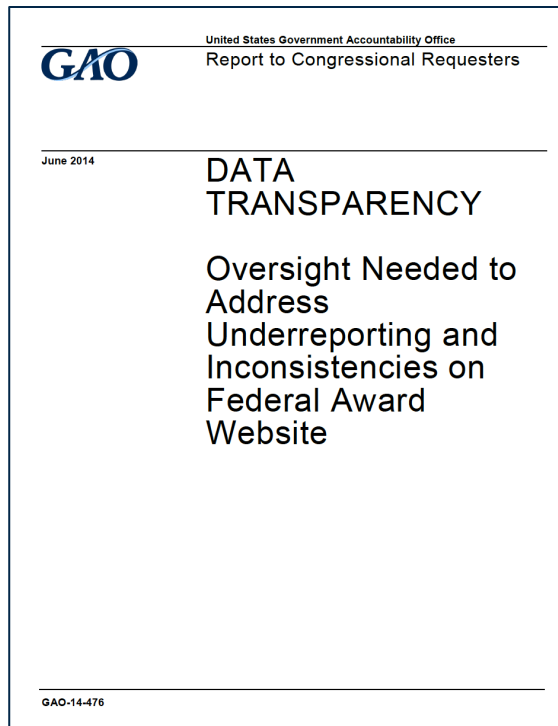

# The Case For Data Standards (continued)

- The DATA Act responds to our recommendation to legislate transparency requirements, including data standards, and clear authority for implementation.
- We recommended that OMB, with the GAT Board, develop a long-term implementation plan and increase efforts to obtain stakeholder input.
- OMB generally agreed with our recommendations and has taken steps to increase stakeholder outreach.

# GAO's July 2014 report shows USASpending.gov data challenges highlight need for effective DATA Act implementation

- In our report evaluating the reliability of USASpending.gov data published in July (GAO-14-476), we found:
- Roughly 300 assistance programs representing \$619B in FY12 awards were not reported to USASpending by January 2013
  - Information on reported awards was largely inconsistent with agency records. Only an estimated 2 to 7 % of reported awards were fully consistent
  - Information on the recipient's location, and the award's place of performance and description differed significantly from agency records
  - Unclear guidance and weaknesses in oversight contributed to these issues

## **GAO's July 2014 report (continued)**

---

- We recommended that OMB clarify its guidance and develop and implement improved oversight processes.
- OMB generally agreed with our recommendations.
- These recommendations are consistent with actions to be taken to comply with the DATA Act.

---

## Effective implementation of the DATA Act can help in addressing these needs

---

The DATA Act of 2014 (DATA Act) requires:

- Treasury and OMB to develop government-wide financial data standards and issue related guidance
- Treasury to establish a data analysis center to provide data and analytical tools for preventing or reducing improper payments and improving federal spending data transparency
- OMB and Treasury to consult with public and private stakeholders in establishing data standards
- Agency IGs to report on agencies' spending data quality and the use of data standards
- GAO to review IG reports and assess agencies' data quality and implementation of the data standards.

---

# DATA Act reinforces related statutory requirements

---

GPRA Modernization Act of 2010 requires:

- OMB to publish an inventory of all federal programs identified by agencies on a central governmentwide website
- Agencies also provide program-level funding and performance information
- Transparency of results achieved through web-based reporting
- More-frequent analysis and monitoring of performance by senior leadership at the government-wide and agency levels to identify and prioritize key performance and management issues
- Disclosure on the reliability and accuracy of performance information

OMB will merge implementation of the program inventory provisions with DATA Act transparency requirements since both laws require web-based reporting

---

# **DATA Act reinforces related statutory requirements**

---

## **Improper Payments Elimination and Recovery Improvement Act of 2012 (IPERIA)**

- Latest in a series of laws addressing government-wide improper payments
- Requires that agencies verify benefit eligibility before making a payment to a person or entity by checking multiple existing databases
- Modified requirements to promote computer matching activities that assist in the detection and prevention of improper payments

## Data analytics at GAO

---

GAO is leveraging open data as part of its piloting of data analytic technologies.

Pilot concepts include:

- Data mining for improper payments analysis
- Link analysis for fraud identification
- Document clustering and text mining for overlap and duplication analysis
- Network analysis for program coordination assessment

Preliminary indications include:

- A substantial decrease in labor and time inputs in analyzing documents and their content
- A possible increase in quality and number of findings
- Enhanced visualization for more efficient communication of key findings

# Data Analytics at GAO: GAO-CIGIE-RATB Forum identified opportunities and next steps

## Accessing and using data

- Need for more awareness of data sources
- Lack of incentives to design systems useful for oversight due to differing missions
- Difficulties in measuring results and prioritizing resources

## Sharing data

- Varying standards make interpreting and using others' data difficult
- Intergovernmental challenges—such as costly access to certain federal data and perceptions that sharing is a “one-way street”

---

# Data Analytics at GAO: Government Data Sharing Community of Practice

---

GAO's Government Data Sharing CoP has hosted a number of events for the audit community:

- **Legal Issues to Data Sharing:** Working with other state auditors to identify challenges and opportunities to overcome barriers to data sharing.
- **Technological Challenges to Sharing Data:** GAO's moderated a panel of experts to discuss common technological barriers to data sharing.
- **Data Sharing Conference:** GAO partnered with MITRE to host an event addressing a wide range of data-sharing issues, including maintaining audit independence, leveraging data analytic resources and techniques to identify fraud.
- **Data Sharing in Disaster Response and Recovery (January 2015):** GAO and MITRE will co-host an event on data sharing in disaster response and recovery.
